

KONGSBERG

K-FLEET PROVISION

KONGSBERG DIGITAL K-FLEET MANAGEMENT APPLICATIONS

K-Fleet is a comprehensive suite of applications designed to help shipping companies optimize their operations, reduce costs and ensure compliance with industry regulations.

With more than 40 years of experience, the K-Fleet software offers a wide variety of solutions to assist users in planned maintenance, inventory management, procurement, QSE, documentation, forms, certificates, voyage reporting, and fleet operations.

K-Fleet Provision

TAKE CONTROL OF YOUR CONSUMABLE PROVISIONS AND ENSURE SUPPLIERS ARE ALWAYS AT HAND

K-Fleet Provision is designed to help shipping companies manage and track their provision stock levels and reorder items as needed.

The system allows users to create a detailed inventory of all the provisions and supplies on board a vessel, including food, cleaning supplies, and safety equipment.

It provides automated inventory management, tracking, and reordering based on pre-defined stock levels, helping to ensure that the right supplies are always on hand while reducing the risk of stockouts and the need for costly emergency orders.

K-Fleet Provision also includes reporting capabilities, which allow users to analyze inventory data and identify trends such as high-use items and adjust their inventory management strategy accordingly.

In addition, the module allows for tracking of expenses and budgeting for provisions, which helps to manage costs and ensure that budgeted amounts are not exceeded.

BENEFITS

- Streamlined inventory management and reordering process
- Automated tracking of usage, reordering, and expenses
- Reduced risk of stockouts
- Manage costs and staying within budget
- Identify trends in inventory data and make data-driven decisions
