

# K-Fleet Budget

#### COST CONTROL MADE EASY

Empower your fleet managers to accelerate the cost planning cycle, increase budget accuracy and automate analytics and reporting.

K-Fleet Budget is an efficient flawless budgeting and cost control system providing fleet managers with the full overview to operate the fleet more cost-efficiently.

The system is easy to use and provides a streamlined budget approval process across the teams onboard and onshore. It enables managers to shorten the cycle from planning and allocating budgets, monitoring actual spending, comparing against the budget, and analyzing variances to identify areas for improvement.

With real-time and automated budget performance tracking, the system provides increased visibility into costs and expenses and enables managers to identify potential issues at an early stage.

To provide a comprehensive overview of fleet operations and financial performance, the K-Fleet Budget module can be integrated with other K-Fleet Management modules, such as K-Fleet Maintenance, and K-Fleet Purchase.

## KONGSBERG DIGITAL K-FLEET MANAGEMENT APPLICATIONS

K-Fleet is a comprehensive suite of applications designed to help shipping companies optimize their operations, reduce costs and ensure compliance with industry regulations.

With more than 40 years of experience, the K-Fleet software offers a wide variety of solutions to assist users in planned maintenance, inventory management, procurement, QSE, documentation, forms, certificates, voyage reporting, and fleet operations.
