K-FLEET DOCKING

KONGSBERG DIGITAL K-FLEET MANAGEMENT APPLICATIONS

K-Fleet is a comprehensive suite of applications designed to help shipping companies optimize their operations, reduce costs and ensure compliance with industry regulations.

With more than 40 years of experience, the K-Fleet software offers a wide variety of solutions to assist users in planned maintenance, inventory management, procurement, QSE, documentation, forms, certificates, voyage reporting, and fleet operations.

K-Fleet Docking

SEAMLESS PLANNING AND COORDINATION OF DOCKING ACTIVITIES

The solution includes features for creating and managing docking specifications and the Request for Quotation (RFQ) process. Users can create detailed specifications for the work that needs to be performed during a shipyard visit and generate RFQs based on those specifications.

The system has functionality for tracking the RFQ process, including the submission and evaluation of quotations from shipyards, and selection of the most suitable shipyard for the work. It also includes contract management and tracking of the work progress during the shipyard visit.
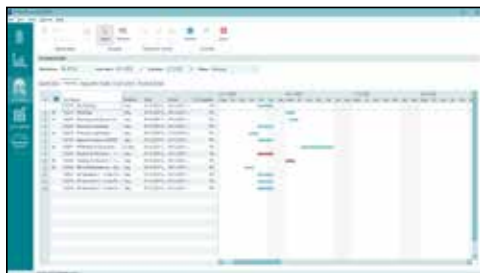

By using K-Fleet Docking, shipping companies can ensure that work during a shipyard visit is clearly defined and executed at the best price. The system allows for seamless coordination of the work and the monitoring of the process, which helps shipping companies to reduce downtime and increase efficiency. xml, ods, tif etc.). Customizable email templates for reporting

WEB PORTAL

K-Fleet Docking includes a web portal where shipyards can review docking specifications and RFQs and submit their quotes including certificates and other relevant documents for any work. This ensures easy and efficient communication between the shipping company and the shipyards and enables shipyards to submit and track their quotes quickly and easily. Shipping companies can easily evaluate the quotes from multiple shipyards and select the most suitable.

Docking specifications

Project scheduling

Yard portal

The web portal enables shipping companies to share information about the progress of work, budget details, and costs related to docking with shipyards. It provides a clear communication channel, reducing the number of errors and mis-understandings to increase the efficiency of the process.

BENEFITS

- Improved planning and coordination of docking activities
- Enhanced transparency and communication between owners, yards and suppliers
- Automated generation of RFQs and streamlined quote comparison
- Increased efficiency in the procurement process
- Improved cost control and cost predictability during docking periods
