# Emission Intensity KONGSBERG (tonne CO<sub>2</sub>e/MNOK)

The KONGSBERG GHG inventory has been prepared in accordance with the GHG protocol. The reporting covers more than 98 percent of all FTE. In our Annual and Sustainability Report for 2023 we did not include our emission intensity (tonne CO<sub>2</sub>e/MNOK), for scope 1, 2 and 3. However, all data required to calculate intensity were reported on. As we are adhering to the highest levels of transparency, we have compiled the data in this table to show the development of the KONGSBERG emission intensity (tonne CO<sub>2</sub>e/MNOK) from the reporting year 2021 – 2023.
