

# TYPE APPROVAL CERTIFICATE

## This is to certify:

that the **Remote Control System, Propulsion, Thruster and Steering**

with type designation(s)  
**MCON**

issued to

**Kongsberg Maritime AS**  
**Kongsberg, Norway**

is found to comply with

**DNV rules for classification – Ships Pt.6 Ch.5 Sec.21 Cyber security**

## Application:

**Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV. This type approval covers security capabilities in accordance with DNV security profile 1 and IACS UR E27 Rev.1, subject to conditions stated in this certificate.**

Issued at **Høvik** on **2025-03-10**

This Certificate is valid until **2027-03-09**.

DNV local unit: **East & South Norway CMC**

Approval Engineer: **Alexander Dahlstrøm Jønsson**

for **DNV**

Digitally signed by: Jarle Coll Blomhoff  
Location: DNV Høvik, Norway

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid. The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

LEGAL DISCLAIMER: Unless otherwise stated in the applicable contract with the holder of this document, or following from mandatory law, the liability of DNV AS, its parent companies and their subsidiaries as well as their officers, directors and employees ("DNV") arising from or in connection with the services rendered for the purpose of the issuance of this document or reliance thereon, whether in contract or in tort (including negligence), shall be limited to direct losses and under any circumstance be limited to USD 300 000.

## Product description

The Mcon Propulsion, thruster and steering gear control (PTSC) system is a processor-based system for controlling the thrust units of the vessel. I.e., controlling thrusters (Tunnel Thrusters or Azimuth thrusters), main propellers and rudders.

The product consists of hardware and software components listed in document 110-0053458 revision D.

At the time of issuance of this TA certificate the system consists of the following main versions:

- Operator Station version 8" Panel Computer, 10.4" Panel Computer & 12" Panel Computer with KM – Embedded Operating System version 1.5.x, HMI Application version 4.7.x and Control System Application version 1.9.x.
- Controller version H1151.6059 Marine Controller & H1170 Marine Controller with KM – Embedded Operating System version 1.5.x and Control System Application version 1.9.x.
- Managed Ethernet switch version Lynx with Westermo Operating System version 4.3x.x.

Changes to the type approved system shall be managed in accordance with document KM-PROC-0080. Major changes shall be documented and submitted to DNV for verification of compliance with applicable requirements, witness new type test and revise this TA certificate. Minor changes are covered by this type approval.

A log of all change reports shall be submitted upon renewal of this TA certificate

## Approval conditions

This TA certificate covers type approval of cyber security capabilities and system architecture in accordance with security profile 1 as specified in DNV-RU-SHIP Part 6 Chapter 5 Section 21.

For each delivery of the system to vessels with DNV class notation Cyber secure(Essential), the following documents shall be submitted for assessment:

- System topology (F030), demonstrating consistency with type approved document 110-0053459 revision C.
- Inventory/equipment list (F071), demonstrating consistency with type approved document 110-0053458 revision D.
- Signed delivery checklist (F262) demonstrating that security capabilities and system architecture have been configured as per document 110-0098175 revision B.

In addition to the documents above, any differences in the delivered system compared with the type approved system shall be documented and submitted for approval.

A Product Certificate (PC) shall be issued for each delivery based on the above document assessment. Certification test is not required as long as the system is correctly represented by this type approval.

Modifications to delivered systems shall be managed in accordance with DNV-RU-SHIP Pt.7 Ch.1 Sec.2 [1.5].

## Application/Limitation

Mcon may be integrated with other systems and equipment as per below:

- Advanced Maneuvering system in the same security zone may connect directly to the Mcon Process network A and B.
- Kongsberg Maritime system in the same security zone may connect directly to Mcon Modbus fieldnet (e.g., K-Chief)
- Kongsberg Maritime system or sensors in the same security zone may connect directly to Mcon OpenCAN network (e.g., Drivers and feedback sensors)
- Kongsberg systems in other security zones may connect to the Mcon Process network A and B via firewalls (e.g., FGR-60F) supplied with the other Kongsberg system (e.g., K-Bridge).
- Third party systems, sensors and actuators may connect to Mcon using hardwired signals or serial communication directly to the Mcon controllers.

All the above connected systems and equipment shall be allocated to a security zone on board.

Mcon may also be integrated with the below systems and equipment:

- Kongsberg Remote Services may connect to Mcon Process network via firewalls (e.g., FGR-60F) supplied with the other Kongsberg system as per type approval TAA00003F4
- Kongsberg Information Management System (K-IMS) may connect to Mcon Process network via firewalls (e.g., FGR-60F) supplied with the other Kongsberg system firewall(s) as per type approval TAA00003F4 and TAA00003F5.

Connected systems and equipment shall be described in signed delivery checklist (F262) / signed version of 110-0098175 revision B and illustrated in the System topology (F030). The integration is subject to testing on board in accordance with applicable requirements in DNV rules.

### Type Approval documentation

110-0053460 revision D Mcon & Adv. Man. Control Systems, Description of Security Capabilities  
110-0053459 revision C Mcon, System Topology  
110-0053458 revision D Mcon, Asset Inventory  
110-0053461 revision F Mcon & Adv. Man. Control Systems, Cyber Security - Test Procedure  
110-0098175 revision B Mcon & Adv. Man. Control Systems, Cyber Security Configuration & Validation Procedure  
KM-GUI-0118 revision A Guideline for Secure Development Lifecycle (SDLC)  
KM-PROC-0080 revision B Change management  
KM-PRO-0120 revision B Configuration Management Procedure  
Cyber security Usermanual Mcon  
110-0068347 revision A Mcon and Advanced Maneuvering Restore procedure

### Tests carried out

Tested according to test procedure 110-0053461 revision B carried out 25<sup>th</sup> and 26<sup>th</sup> of June 2024.  
Tested according to test procedure 110-0053461 revision F carried out 20<sup>th</sup> and 21<sup>st</sup> of November 2024.

### Place of manufacture

Kongsberg Maritime AS, Longvafjordvegen 379, 6293 Longva, Norway

### Marking of product

The products to be marked with:

- manufacturer name
- model name
- product number

### Periodical assessment

The scope of the periodical assessment is to verify that the conditions stipulated for the type are complied with, and that no alterations are made to the product design or choice of systems, software versions, components and/or materials.

The main elements of the assessment are:

- Ensure that type approved documentation is available
- Inspection of factory samples, selected at random from the production line (where practicable)
- Review of production and inspection routines, including test records from product sample tests and control routines
- Ensuring that systems, software versions, components and/or materials used comply with type approved documents and/or referenced system, software, component and material specifications
- Review of possible changes in design of systems, software versions, components, materials and/or performance, and make sure that such changes do not affect the type approval given
- Ensuring traceability between manufacturer's product type marking and the type approval certificate
- Review documented evidence of adherence to Secure Development Lifecycle processes

A renewal assessment will be performed at renewal of the certificate.
