FLEET MANAGEMENT

A PORTAL FOR FLEET MANAGEMENT APPLICATIONS

· ·

A modular software system designed to assist users' working processes within planned maintenance, inventory management, procurement, QSE, documentation, forms, certificates, voyage reporting and fleet operations.

World wide fleet management

KONGSBERG proudly presents Fleet Management, a software suite building on former Consultas software delivered to the maritime market for more than 40 years. Our systems are developed according to best practice and class regulations, based on state-of-the art software tools.

Easy to use

The Fleet Management suite represents a new generation of software for our clients. The software has been modernized while maintaining the same user-friendly format.
The software comes with a dashboard functionality containing system information, system set-up and user administration.
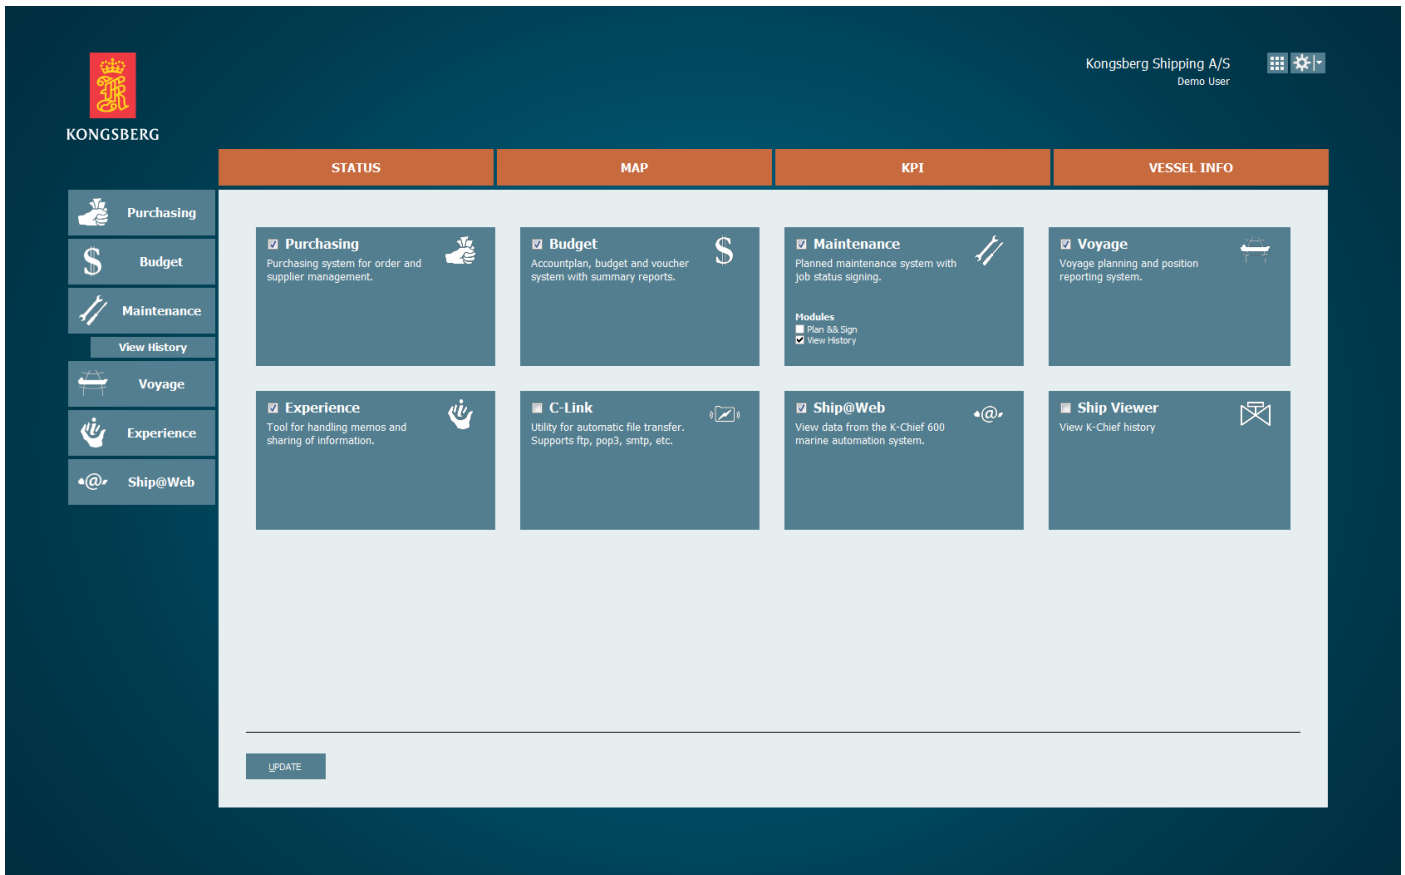

Great flexibility

Fleet Management is a modular software system, which can be tailored to the requirements of each particular vessel type. A user friendly interface make it quick and easy to use for the operator.

Sales, installation, commissioning and service support is provided by KONGSBERG's worldwide network.
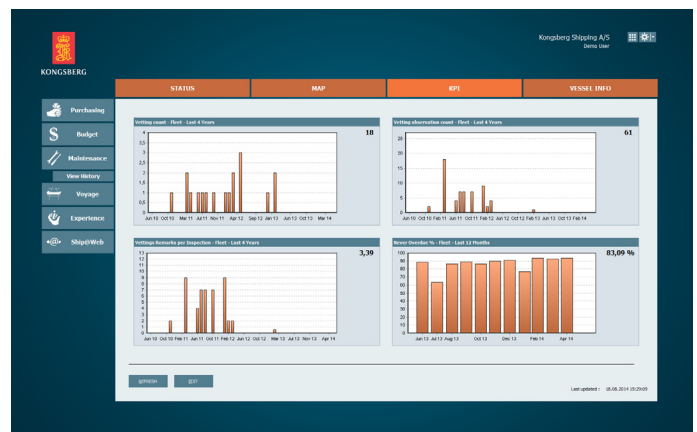

Available modules:

- C-Voyage
  Fuel performance and environmental accounting.
- C-Experience
