KONGSBERG

Policy for Environmental Management in KDA

KDA-POL-0012

COMPANY
INTERNAL

Rev. C

Page 1 of 1

Kongsberg Defence & Aerospace (KDA) supplies military and commercial systems with extreme performance for extreme conditions.

As a responsible corporate citizen, our approach to environmental management is:

- We work to protect the environment both in a short and long term perspective, to prevent pollution and to reduce the carbon footprint of our activities
- We educate and train our employees in environmental issues and the environmental effects of our activities
- We comply with all relevant national and international environmental legislation
- We work according to the strategic direction set out by our owner
- We consider environmental protection in a life-cycle perspective when we work with our products and services
- We work proactively to improve the environmental performance of our supply chain
- We continually improve the performance of our environmental management system

This environmental policy forms a general framework for our environmental efforts.

The statement (of this policy) will be periodically reviewed to ensure its continuing suitability, be available to the public and communicated to all persons working for, or on behalf of KDA.

Policy Approval

This policy has been approved by:

Eirik Lie
